Ania Walwicz was a contemporary Australian poet, playwright, prose writer and visual artist. Walwicz was born in Swidnica, Poland where she spent her childhood, before migrating to Australia in 1963. She attended the Victorian College of the Arts in Melbourne. Her writing tends toward an impressionistic, stream of consciousness exploration of inner states. It also exploits 'appropriative' or 'sampling' techniques of production. Apart from publication in numerous anthologies, journals and several

The infrastructure costs alone are staggering. We will need to spend as much money on infrastructure over the next 40 years as we have since Australia was first colonised □ a figure that is estimated by some sources to be around $1.5 trillion.It is already estimated that Australia is already at least five years behind in the infrastructure that it needs and, as successive governments fail to ...

'Virtual Voyages' is a fascinating account of the European discovery of the elusive 'great south land' told through the literature of 'imaginary voyages'. Written at the height of the era of European maritime exploration, these bizarre and captivating tales, with their wildly imaginative visions of antipodean inversion and strangeness, reveal a hidden history of attitudes to colonization. By exposing the relationship between myth and reality in the antipodes, this book casts new light on the power of fiction to influence history. In the post-colonial studies field, books about travel writing and empire have tended to focus on the high period of nineteenth-century imperialism and on the colonial settings of Africa and India. This book offers a fresh perspective by focussing on the eighteenth century, and referring to the geographical region of Australia and the Pacific, which has had far less attention. The book also breaks new ground by being the first to approach the genre of the imaginary voyage from a post-colonial perspective. In addition to the new insights into European colonialism that it offers, the book illustrates many broader themes in eighteenth-century history and thought. These include connections between the rise of science and modern imperialism, the development of narrative history and fiction and the influence of romanticism, the evolution of the early novel in Britain and France, and the role of mythology in the development of national identity.

First published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

This collection addresses the important function of utopianism in social and political philosophy and includes debate on what its future role will be in a period dominated by dystopian nightmare scenarios.

This exciting, highly illustrated book reveals the impact of the desert on Australian culture.

Remembering German- Australian Colonial Entanglements emphatically promotes a critical and nuanced understanding of the complex entanglement of German colonial actors and activities within Australian colonial institutions and different imperial ideologies. Case studies ranging from the German reception of James Cook□s voyages through to the legacies of 19th- and 20th- century settler colonialism foreground the highly ambiguous roles played by explorers, missionaries, intellectuals and other individuals, as well as by objects and things that travelled between worlds □ ancestral human remains, rare animal skins, songs and even military tanks. The chapters foreground the complex relationship between science, religion, art and exploitation, displacement and annihilation. Contributors trace how these entanglements have been commemorated or forgotten over time □ by Germans, settler-Australians and Indigenous people. Bringing to light a critical understanding of the German involvement in the Australian colonial project, Remembering German- Australian Colonial Entanglements will be of great interest to scholars of colonialism, postcolonialism, German Studies and Indigenous Studies. But for the editors□ substantial new introductory chapter, these contributions originally appeared in a special issue of Postcolonial Studies.

This paper examines the way in which contemporary Australian novelists use various tropes derived from exploration in order to embellish themes of personal search in their fiction. By doing so they have borrowed from the language and myths created by what was essentially an exercise in imperialism, and applied them to the quest by individuals in the settler society to find a permanent spiritual home in the new country. The exploration imagery proves to be apposite, in that just as the empire's hopes were dashed when exploration of the inland was repelled by the barren heart of the continent, so too has the metaphysical exploration of the same spaces foundered on uncompromising and withholding landscapes.
