Link to abstract Catharina Sikow-Magny joined the European Commission in 1997 and is the Director responsible for Internal Energy Market and the Head of Unit in charge of retail markets, coal and oil in the Directorate General for Energy. Before that, she was the Head of Unit in charge of networks and regional initiatives.

Programme - Smart Energy Systems

Abstract. Introduction Following the trend of low-radiation dose computed tomographic (CT) imaging, concerns regarding the detectability of low-contrast lesions have been growing. The goal of this research was to evaluate whether a new image-based algorithm (Mono+) for virtual monoenergetic imaging with a dual-energy CT scanner can improve the contrast-to-noise ratio (CNR) and conspicuity of these low-contrast objects when using iodinated contrast media.
