Airplane quiz - SmartCockpit

The A320 Family jetliners then move to a multi-purpose bay for system tests, and the aircraft is readied for cabin installation. This clears the way for the final operations: engine installation, fuel and pressurisation tests, painting, engine run-up and flight testing, followed by aircraft acceptance and delivery.

on specially-manufactured partial aircraft test sections. The original A320 configuration will be taken into consideration, as well as the specificities of each type.

New service package will extend A320's life - Airbus
The A320 was the model aircraft for Airbus that pushed the company to become a household name. With more than 400 orders before the aircraft even took flight (especially compared to the earlier A300 that only had 15 orders), the A320 series would quickly become a staple product for the company. However, only one year after the A320 family launched, Airbus announced a further derivative of ...
