Human resource management (HRM) is a term which is now widely used but very loosely defined. In this paper it is argued that if the concept is to have any social scientific value, it should be defined in such a way as to differentiate it from traditional personnel management and to allow the development of testable hypotheses about its impact.

Human Resources and their Development is a component of Encyclopedia of Human Resources Policy, Development and Management in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Human Resources and their Development provides the essential aspects and a myriad of issues of great relevance to our world such as: Human Resources and their Development; Major Issues in Human Resource Development; Elements of Planning Strategies for Human Resource Development; Human Life Systems, Diversity and Human Development; Human Development and Causes of Global Change; Consequences of Global Change for Human Resource Development. These two volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

Construction organisations worldwide are struggling with three issues: total quality management, supply chain management and knowledge management. Pressures from clients and recognition of the relatively slow growth in productivity in the sector are causing managers to focus on structural and strategic management issues. This book tackles each of these three themes, demonstrating their significance as strategic concepts for the construction sector and illustrating how development goals in each of these critical areas can be met. The book combines a theoretical basis with practical tools for management. Written by some of the world's leading experts, and illustrated with international case studies, Total Quality

in the Construction Supply Chain offers students a clearly structured introduction to the concept of quality in the construction industry, while posing challenging questions for the most experienced professionals. ·Key management techniques applied specifically to the needs of the construction industry. ·International case studies discussed. ·Demonstrates how to achieve real and lasting improvements in quality across the industry.

'Oakland on the New Quality Management' shows managers how to implement a Total Quality Management strategy throughout all activities and thereby achieve top quality performance overall, not just focusing on product or service quality. The text addresses the issues of implementing TQM, teamwork, and changes in culture, and emphasizes the integration of TQM into the strategy of the organization with specific advice on how to implement TQM. Topics covered include quality function deployment (QFD), communications and quality strategy, measurement and benchmarking, and teamwork for culture change, including the 'Drive' model. Ten points are presented to aid senior management in their thinking on commitment, culture and communication issues.

'TQM: Text with Cases' is clearly written in a logical manner and points are supported by real life case studies. Professor Oakland demonstrates how a Total Quality Management strategy can be applied in all business activities to achieve world-class performance. This third edition features several major changes including new material on process modelling and management, quality management systems, people development, performance measurement, the Business Excellence Model, self-assessment, benchmarking, and the implementation of TQM. Case studies reflecting the latest developments in the area from leading exponents of TQM and Business Excellence have been included. These focus on organizations which have fully integrated the TQ approach into their business operations and delivered real benefits.
