The most comprehensive volume on one of the most innovative architects of the 20th-century. Contains many never-published drawings & photographs. -- Tie-in with Museum of Contemporary Art, Los Angeles.

Maverick of mid-century American architecture "Each of my buildings deal with a different architectural problem, the existence of which has been forgotten in this period of Rational Mechanization. The question of whether a house is really a house is more important to me, than the fact that it is made of steel, glass, putty or hot air." - R. M. Schindler Hailing from Vienna, Rudolph Michael Schindler (1887-1953), like his colleague Richard Neutra, emigrated to the US and applied his International Style techniques to the movement that would come to be known as California Modernism. Influenced by the work of Frank Lloyd Wright and taking cues from spatial notions found in cubism, he developed a singular style characterized by geometrical shapes, bold lines, and association of materials such as wood and concrete, as seen in his own Hollywood home (built in 1921-22) and the house he designed for P.M. Lovell in Newport Beach (1923-24). About the Series: Each book in TASCHEN's Basic Architecture Series features: an introduction to the life and work of the architect the major works in chronological order information about the clients, architectural preconditions as well as construction problems and resolutions a list of all the selected works and a map indicating the locations of the best and most famous buildings approximately 120 illustrations (photographs, sketches, drafts and plans)
