uChip mounted on a breadboard.  
Arduino Zero compatible, with narrow  
(0.3" row spacing) 16-pin DIP footprint  
(breadboard compatible). It features  
built-in buck (to power external  
circuitry) and boost (to power USB  
devices when operating as a USB  
host) converters and software  
selectable output voltage. Nucleo  
boards.

List of Arduino boards and compatible  
systems - Wikipedia

For the Open-V, Arduino compatibility  
encompasses standard firmware  
libraries, a bootloader, development  
tools, and interoperating on a  
hardware level with existing Arduino  
shields. Standard Arduino Library.

# Bookmark File PDF Arduino Compatibility Mode

We've ported the standard Arduino library to the Open-V microcontroller. This involved customizing the library both for the Open-V CPU and the Open-V peripherals.
