In mathematics, a square root of a number  $x$  is a number  $y$  such that  $y^2 = x$ ; in other words, a number  $y$  whose square (the result of multiplying the number by itself, or  $y \times y$ ) is  $x$ . For example, 4 and  $\sqrt{4}$  are square roots of 16, because  $4^2 = (\sqrt{4})^2 = 16$ .
