The purpose of this capstone project was to determine if the integration of ATI's Nurse Logic 2.0 impacted the ATI Fundamentals 2013 proctored exam student learning outcomes of associate degree in nursing (ADN) students taking a Fundamentals course at a community college in Ohio. Mayer's Cognitive Theory of Multimedia Learning (CTML) was used as a guiding principle to ensure proper implementation of the ATI Nurse Logic 2.0 multimedia eLearning modules. The results of this capstone project indicated that the integration of ATI's Nurse Logic 2.0 did not impact the ATI Fundamentals 2013 proctored exam scores and the null

2018 hypothesis was accepted. The results of this study were likely impacted by the limitations of the study including the varying medical backgrounds of the Fundamentals students and the distractors student's experiences when completing the ATI Nurse Logic 2.0 modules outside of class time. Also, there was an uneven distribution of students before and after the implementation of the ATI Nurse Logic 2.0 modules during the retrospective data collection period due to inclusion and exclusion criteria and because enrollment at the college declined. Implications of this capstone project support that the integration of a multimedia eLearning module does not impact student knowledge and

compassion between caregiver
and patient.

Health care systems worldwide are faced with the challenge of improving the quality of care. Providing evidence from health research is necessary but not sufficient for the provision of optimal care and so knowledge translation (KT), the scientific study of methods for closing the knowledge-to-action gap and of the barriers and facilitators inherent in the process, is gaining significance. Knowledge Translation in Health Care explains how to use research findings to improve health care in real life, everyday situations. The authors define and describe knowledge translation, and

Download File PDF Ati Proctored Fundamentals

2018 outline strategies for successful knowledge translation in practice and policy making. The book is full of examples of how knowledge translation models work in closing the gap between evidence and action. Written by a team of authors closely involved in the development of knowledge translation this unique book aims to extend understanding and implementation worldwide. It is an introductory guide to an emerging hot topic in evidence-based care and essential for health policy makers, researchers, managers, clinicians and trainees.

Packed with clinical examples, proven pedagogy, striking illustrations and online learning
