The Biomedical Engineering (BME) field has been continuously providing the piles required to bridge the gap between advances in technology and demands for improving human's well-being. Consequently, BME is involved in nearly all medical disciplines such as: cardiovascular, orthopedics, surgery, obstetrics and gynecology, dentistry, physiotherapy, rehabilitation, forensics, sport science etc.

Biomedical Engineering: Bridging Technology & Medicine | AIU

Biomedical engineering now encompasses a range of fields of specialization including bioinstrumentation, bioimaging, biomechanics, biomaterials, and biomolecular engineering. This introduction to bioengineering assembles foundational resources from molecular and cellular biology and physiology and relates them to various sub-specialties of biomedical engineering.
