BMW is a company associated with motoring firsts. The very idea of a sports sedan was merely a novelty until BMW introduced the 5 series in 1972. As BMW's "middle child," the 5 series has drawn features from the company's smallest and largest models, establishing a reputation for performance and practicality through multiple generations. This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60's major makeover for 2008 and the development of the e70 X5. Specific mechanical, electronic and cosmetic changes are described, including the time of and reasons for their introduction. Several aspects of BMW's corporate history and technically related models such as the 6-series are also described, as are aftermarket modifications by Alpina, Hartge, and other specialist BMW tuners and speed shops. The book includes more than 200 photographs.

Childhood is defined in different preconceived manners by different discourses. Thus the categories defined by age such as infant, child, adolescent and so on, are to some extent arbitrary divisions that are subject to the evolution in clinical, societal, ideological and political discourses. Within psychoanalysis there has been a conflation of childhood construed through the retrospective memories of adults, and childhood as seen through the perspective of infant observations. In What is a Child? the author argues that the place of the child as subject in the fullest sense has been neglected through these tendencies, and that such confusion has marked the history of the psychoanalysis of the child itself, which began as a family affair. In this book, the author endeavours to tease out the different notions of time and history that are implicit in the history of child psychoanalysis and in the clinical approach to childhood. He closely examines the beginnings of psychoanalysis of the child, particularly emphasising the contributions of Hermine Hug-Hellmuth. It was she who emphasised the impossibility for parents to analyse their own children.
