Most providers, including BT, will offer you free phone line installation if you sign up to a broadband package with them. If you're just signing up to line rental, however, BT charges £130 to either activate an old line or install a new one. Other providers may charge anything between

£20-£60 for installation either way.

Getting a new broadband line installed: Your easy guide
BT Broadband and TV Installation service terms. What we provide. 1. We will: a. install and connect your BT Hub and connect a device to the BT Broadband service; b. demonstrate

a working product and test your Wi-Fi signal; c. connect any additional kit for other BT products and services such as Complete Wi-Fi; d.

BT's Superfast Fibre broadband (previously known as BT Infinity), usually costs about £60 to install. However, it

sometimes does special deals where the activation or upfront fees are waived. As well as installation costs, there is usually a £9.99 delivery charge for your BT router.

Stage 2 - Work to complete the fibre installation in your home. This stage usually happens seven working days after stage one, and you'll need to be at home to let the

engineer in. The appointment will last up to four hours. Your BT Hub should arrive by post two days before your installation date. Please have it ready to hand when the engineer arrives.

be connected via FTTP, installation will be necessary in order to get you hooked up. Unlike FTTC providers, which can often switch you to their broadband without any installation, FTTP needs someone to come and sort it for you. This process is often very quick, with an engineer finishing in under an hour.

Fibre Broadband. This would be three years in the making for myself, so it couldn't have come soon enough! There are already a couple of blogs that cover off Openreach's process for installing Full Fibre Broadband, but most are three or four years old and there were a couple of differences that I noted

between my install experience and those posted elsewhere ...

Guide: How is Fibre broadband installed (BT Openreach)

The real difference between a 1 and 2 stage install is the number of visits that are expected to the property to get a full fibre service up and running. The lucky

premises that have a 1 Stage install are those that already have a Customer Splice Point (CSP - a small grey box) already installed in the premises, or the connectorised fibre is already pushed through and coiled up on the outside wall of the property.

Fibre Broadband (FTTC

/ FTTH) Guide | thinkbroadband

This is pure end-to-end Fibre-to-the-Premises (FTTP) technology, delivering ultrafast broadband speed and reliability to meet both the current and future demands of customers. With Power On ultrafast fibre, we provide a superior fibre solution, with the option of a

Fibre Integrated Reception System (FIRS) - a full satellite TV system, procured from just one supplier and typically under budget.
