Build-it-yourself guru Aubrey Pilgrim delivers a top-to-bottom update of his bestselling guide to building a complete, custom-made Pentium-chip system—including peripherals—at a fraction of dealer prices. Pilgrim provides new, updated or expanded coverage of all the latest Pentium chips, multispeed CD-ROMs and other new multimedia components, Windows 95 and OS/2 Warp, and hard-drive specs.

This new installment in Aubrey Pilgrim's Save a Bundle series shows how to assemble an inexpensive 80486 computer that exceeds the power and efficiency of most minicomputers and takes full advantage of the new OS/2 operating system. Readers with existing systems will also learn how simple it is to upgrade by installing a new motherboard or using a 80486 plug in board - saving thousands of pounds in the process. Pilgrim reviews available software packages and discusses peripheral devices such as disk drives, moitors, keyboards and printers - providing readers with a comprehensive list of sources for low cost components and equipment. The book also details hundreds of business and personal applications that 486 systems can perform.
