~~Ultimate Flash Buying Guide - All You Need To Know~~

A camera flash is a device used for producing a flash of artificial light. This artificial light is generally used to illuminate a dark scene, though it can also help in capturing moving objects quickly. There are three basic types of camera flashes; on-camera flash, off-camera flash and in-camera flash.

~~Buying Guide - Camera Flash | Unique Photo~~

Understanding Guide Numbers \u2022 The guide number can help you calculate the range of a specific flash by dividing the guide number by the f/stop you plan on using. $\text{flash-to-subject distance} = \text{guide number} / \text{f-stop}$ For example, the Nikon SB-910 used in the video has a guide number of 34 meters. So, shooting at f4, you could use the following equation to figure out that the SB 910 has a range of 8.5 meters.

~~10 Things to Know Before Buying a Camera Flash~~

In this buying guide, I'll list the current flash models for Nikon, Canon, and Sony flashes, along with my recommendations. If you want to better understand the different flash features available so you can make a more educated buying decision, the rest of this guide gives you an overview of flash features found on different models.
