Prepared by the Highway Innovative Technology Evaluation Center (HITEC), a CERF Innovation Center. This report describes an evaluation to determine the capabilities and limitations of the KeySystem I Retaining Wall System, a mechanically stabilized earth structure developed, designed, and supplied by Keystone Retaining Wall Systems, Inc. The evaluation was conducted based on design, construction, performance, and quality assurance information outlined in the HITEC Protocol. KeySystem I features modular block facing to which KeyStrips are attached. KeyStrips are structural welded wire, grid-type reinforcement produced from high-strength steel.

Offers information from selected transit agencies about the underlying causes of construction disputes and practices in use today to identify and resolve them before they become formal claims. The synthesis focuses on avoidance and resolution of disputes, examines ways of settling disputes at their inception, and considers the experiences of the transit industry in the use of alternative dispute resolution techniques.

Quality is a vital issue to be addressed by all construction professionals working in Europe today. This book provides clear, concise guidance to the making and use of codes, regulations and technical specifications in Europe.
