In the United States, homeownership is synonymous with economic security and middle-class status. It has played this role in American life for almost a century, and as a result, homeownership's centrality to Americans' economic lives has come to seem natural and inevitable. But this state of affairs did not develop spontaneously or inexorably. On the contrary, it was the product of federal government policies, established during the 1930s and developed over the course of the twentieth century. *At the Boundaries of Homeownership* traces how the government's role in this became submerged from public view and how several groups who were locked out of homeownership came to recognize and reveal the role of the government. Through organizing and activism, these boundary groups transformed laws and private practices governing determinations of credit-worthiness. This book describes the important policy consequences of their achievements and the implications for how we understand American statebuilding.

In this fully updated Eighth Edition of *Leadership: Theory and Practice*, a new chapter on Followership examines the central role followers play in the leadership process and unpacks the characteristics of both effective and ineffective followers. The new edition also includes a new Ethical Leadership Style Questionnaire and new coverage on the dark side of leadership and destructive leadership. Adopted at more than 1600 institutions in 89 countries and translated into 13 different languages, this market-leading text successfully combines an academically robust account of the major theories and models of leadership with an accessible style and special emphasis on how leadership theory can inform leadership practice. Peter G. Northouse uses a consistent structure for each chapter, allowing students to easily compare and contrast the various theories. Case studies and questionnaires provide students with practical examples and opportunities to deepen their personal understanding of their own leadership.
