This intriguing book explores how ordinary people in traditional China used contracts to facilitate the transactions of their daily lives, as they bought, sold, rented, or borrowed land, livestock, people, or money. In the process it illuminates specific everyday concerns during China's medieval transformation. Valerie Hansen translates and analyzes surviving contracts and also draws on tales of the supernatural, rare legal sources, plays, language texts, and other anecdotal evidence to describe how contracts were actually used. She explains that the educated wrote their own contracts, whereas the illiterate paid scribes to draft them and read them aloud. The contracts reveal much about everyday life: problems with inflation that resulted from the introduction of the first paper money in the world; the persistence of women's rights to own and sell land at a time when their lives were becoming more constricted; and the litigiousness of families, which were complicated products of remarriages, adoptions, and divorces. The Chinese even armed their dead with contracts asserting ownership of their grave plots, and Hansen provides details of an underworld court system in which the dead could sue and be sued. Illustrations and maps enrich a book that will be fascinating for anyone interested in

The Republic of China on Taiwan is the last nation in the world to be excluded from the United Nations. The world's seventeenth largest economy and Asia's most vibrant democracy, Taiwan has continually to convince the world of its historical independence from the People's Republic of China. At the same time, however, forces of history and contemporary economics make Taiwan's intimate cultural and economic ties to the mainland another crucial reality. Yet somehow under these singular conditions, the people of the island go about their daily affairs, making themselves a remarkable font of creativity and cultural innovation. The *Minor Arts of Daily Life* is an account of the many ways in which contemporary Taiwanese approach their ordinary existence and activities. It presents a wide range of aspects of day-to-day living to convey something of the world as experienced by the Taiwanese themselves. What does it mean to be Taiwanese? In what way does life in Taiwan impart a different view of Chinese culture? How do Taiwanese envision and participate in global culture in the twenty-first century? What issues (cultural, social, political, economic) seem to matter most? What does China mea

Hitherto, studies of Chinese leisure have focused on holidays, festivals and tourism. This, however, is a study of the kinds of leisure that take place on regular workdays in a local environment of Quanzhou city. In doing so, Leisure and Power introduces leisure studies to China studies, and data from China to the field of Leisure studies. Based on interviews with people from all walks of life and case studies from bookshops, internet bars, Karaoke parlours, streets and public squares, Rolandsen brings to attention the importance of fun and socializing in the lives of Chinese urbanites. Central to the study is the contrast between popular practices and official discourse. Rolandsen provides in-depth analyses of the moralist "PRC leisure ethic" so characteristic of official Chinese publications and news media. Using examples from everyday life as a contrast, this study demonstrates that official propaganda has but little influence on how Chinese individuals lead their lives. Taking leisure as a point of departure, this book describes the new kinds of interaction between the local party-state and the population it seeks to govern. This book will be of interest to students and scholars of Chinese Studies, Leisure Studies, Urban Studies and Asian Studies in general.
