Lab (Tutorial): Darwinian Snails This tutorial-style lab investigates the requirements for evolution by natural selection using an engaging simulation of crab predation on snails. Students are able to manipulate the snail population to sequentially "turn off" variation, heritability, and differential survival based on shell thickness to investigate the importance of each of these factors.

~~EvoBeaker | SimBio~~
SimBio Virtual Labs®: EvoBeaker® Darwinian Snails Prelude The flat periwinkle is a small snail that lives on seaweeds growing on rocky shores in New England. Among the snail's enemies is the European green crab. As its name suggests, the European green crab is not native to North America. It traveled from Europe early in the 19th century. Before 1900, the green crab did not occur north of Cape Cod, Massachusetts.
