My book, *The Snow Angel*, is a cute little story about a small family. A story about a young girl who got left at an orphanage, who had a really hard time trying to open up to others, to make friends with the other children. She has hoped for the right one to call her own, but after so long and so many falls, it was after so many months later that she fought the bitter cold. As you will see more into my story, she spent several days outside in the freezing temp and days outside on her own as she went searching for the right family.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

"Pickup" and "sports utility vehicle" seem like quaint names for these workhorses. More and more, they're what people tune up, trick out, and take on the road (or off). This book aims to help drivers make the most of their machines. With 101 projects running the gamut from installing light bars and brush guards to gearing up for hard-core horsepower and high-performance feats, this book will show truck and SUV owners of all stripes how to personalize their rides. *101 Performance Projects for Your Pickup and SUV* offers easy-to-follow, clearly illustrated how-to information on everything from appearance modifications to more extensive upgrades, with plenty of instructions for the many bolt-on solutions that are available in the marketplace. Planning, tools, expenses, pros, and cons: it's all here. The author walks owners through the nuts and bolts of lowering and lift kits, running boards and in-car entertainment systems, winches, wheels and tires, and the full range of installations and accessories that will take a truck or an SUV to the next level.

challenges that modern farmers face. This book provides readers a glimpse into life on a modern Missouri farm where a variety of grains, grass seed, corn, and cattle are produced. All of the conversations, events, and descriptions are drawn from the author's experience working alongside and observing this father and son family farm operation during the course of a year. Farming today is technologically complex and requires a broad set of skills that range from soil conservation, animal husbandry, and mechanics to knowledge of financial markets and computer technology. The focus on skills, in addition to the size of the financial risks, and the number of unexpected challenges along the way provides readers with a new perspective and appreciation for modern farm life.

In his revealing and frank autobiography, David G. Atwood, II takes us into a world of government corruption, back-stabbing politicians and an all too familiar tour of the criminal justice system. Persecuted by a corrupt sheriff's department for exposing a cabal of local corruption that reached into the upper echelon of international politics; prosecuted and sent to federal prison for a crime he didn't commit; and discriminated against for being gay, David leads us on a journey through the life of a prisoner that only an insider could tell and captivates us with a story of courage that will inspire everyone who reads it. Whether revealing the drug connections that for years have padded the pockets of the local cops and exposing how government-sanctioned drug deals in Vicksburg, Mississippi helped illegally fund the Nicaraguan Contras in the 1980's, David leaves no hole's barred as he takes aim at those who would misuse their political power for personal gain.
