This time honoured classic has been re-built completely: after six editions the editor has decided that a radical revision is necessary. The new edition has been developed as a result of intensive consultation with trainees in OB/GYN as to what they want, what they need and how they learn. The book is organised into two halves covering obstetrics and gynaecology. Within each, the chapters are structured into sections containing pedagogic features such as boxes, highlights and key points for the first time. It contains everything the clinician needs to practice the art of obstetrics and gynaecology and sufficient information to help sub-specialists develop their specific

hospice, palliative care service, or medical library should be without this essential source of information.

Chapters are introduced with a non-formal statement that sets the tone for developing the core idea. They are then structured into subtopics and are further divided into small and discrete sections to which the reader's attention is sought. Concise, high-yield subject matter is provided in boxes, to enhance the study experience of the students. Flow charts give easy understanding of evaluation and management protocols in a student-friendly manner. The practicing obstetrician-gynecologist should be equipped today with a far richer armamentarium than ever before. This is in part due to sheer exp.
