Assuming no prior knowledge, the second edition of Foundations of Economics introduces students to both microeconomic and macroeconomic principles. This is the ideal text for foundation degrees and non-specialist courses for first year undergraduates.

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Aims to create a seminar on the Christian worldview of economics that can be used to educate Christians about biblical economic principles and to survey Christians about their worldview of economics in relation to the marketplace. It is intended to help Christians make a stronger connection between their faith and their work.

Test Bank for Introductory Economics and Introductory Macroeconomics and Introductory Microeconomics is an instructor's aid in developing examinations for students to test their comprehension, recall, and ability to analyze and interpret the basic concepts discussed in "Introductory Economics," "Introductory Macroeconomics," and "Introductory Microeconomics." With more than 2,000 five-response, multiple-choice questions, the "Test Bank" reflects the structures of the texts. The questions cover macroeconomic problems, supply and demand, the problem of unemployment, inflation, and measuring economic activity. Other questions cover aggregate demand, aggregate supply and the economy, fiscal problems, money and banking, as well as money, credit and the economy. Some questions deal with monetarist theory, international trade, the foreign exchange market, international economics. Some interesting response choices concern the problems of the dollar, goals, trade-offs, scarcity and choice, specialization, the micro side of demand and supply. Other questions deal with markets at work, consumer choice, production and costs, producer choice (monopoly), producers in competitive markets, capital, and natural resource market. Professors and lecturers of economics and business courses will find the "Test Bank" very useful. Students of economics, whether they are economics majors are just taking the subject as a requirement in another course, will also benefit from it.

An Empirical Investigation of Stock Markets: The CCF Approach attempts to make an empirical contribution to the literature on the movements of stock prices in major economies, i.e. Germany, Japan, the UK and the USA. Specifically, the cross-correlation function (CCF) approach is used to analyze the stock market. This volume provides some empirical evidence regarding the economic linkages among a group of different countries. Chapter 2 and Chapter 3 analyze the international linkage of stock prices among Germany, Japan, the UK and the USA. Chapter 2 applies the standard approach, whereas Chapter 3 uses the CCF approach. Chapter 4 analyzes the relationship between stock prices and exchange rates. Chapter 5 analyzes the relationship among stock prices, exchange rates, and real economic activities. Chapter 6 summarizes the main results obtained in each chapter and comments on the possible directions of future research.

Part I provides an introduction to this study of players' beliefs and decision rules in to obtain data in order to public good games. The experimental method will be used test theoretical ideas about beliefs and decision rules. Chapter 1 discusses some methodological issues concerning experimentation in the social sciences. In particular, this chapter focuses on the relationship between experimental economics and social psychology. Chapter 2 provides an overview of psychological and economic ideas concerning players' beliefs and decision rules in public good games. This chapter forms the theoretical foundation of the book. Chapter 3 discusses some basic experimental tools which will be used in the experiments to be reported in part II. These basic experimental tools make up two procedures, to obtain a measure of a player's social orientation and a measure of her or his beliefs. 1. Experimentation in the social sciences 1.1 Introduction The study of human behavior is an area where economics and psychology overlap. Although both disciplines are concerned with the same human beings, they often have different points of view on how people make choices and the motivation behind it.
