chapter provides a comprehensive approach to nursing care of the child and family, organized within the nursing process framework. Extensive use of tables and illustrations should enhance the reader's understanding of disease processes, mechanisms of injury and nursing interventions. Appendices include teaching instructions for parents for select injuries and illnesses, normal paediatric laboratory values, growth charts and recommended immunization schedules.

Children represent a special challenge for

emergency care providers, because they have unique medical needs in comparison to adults. For decades, policy makers and providers have recognized the special needs of children, but the system has been slow to develop an adequate response to their needs. This is in part due to inadequacies within the broader emergency care system. *Emergency Care for Children* examines the challenges associated with the provision of emergency services to children and families and evaluates progress since the publication of the Institute of Medicine report *Emergency Medical Services for Children* (1993), the first comprehensive
