The Second Edition of Health Program Planning and Evaluation will help you to systematically develop, thoughtfully implement, and rigorously evaluate health programs across a variety of health disciplines. This thorough revision includes updated examples and references throughout, reflecting the major changes within the field. This outstanding resource prepares students and professionals to become savvy consumers of evaluation reports and prudent users of evaluation consultants. It presents practical tools and concepts in language suitable for both the practicing and novice health program planner and evaluator.

Take control of your resources and get the most out of your work with this helpful guide on organization and productivity. From new product launches to large-scale training initiatives, organizations need the tools to measure the effectiveness of their programs, processes, and systems. In Evaluation in Organizations, learning theory experts Darlene Russ-Eft and Hallie Preskill integrate the most current research with practical applications to provide a fully revised new edition of this essential resource for managers, human resource professionals, students, and teachers.

“The perfect text for any health care professional who wishes to gain a sound understanding of research...This text succeeds where others fail in terms of the thoroughness of the research process and the accessible style in which the material is presented. In an age when nursing and health care research is going from strength to strength this book offers those in the world of academia and practice an excellent and essential ‘bible’ that is a must on any bookshelf” Dr Aisha Holloway, Lecturer Adult Health, Division of Nursing, The University of Nottingham ‘a book that helps you each step of the way. A very understandable and enjoyable publication’ Accident and Emergency Nursing Journal ‘key reference resource that students of research can use at various levels of study. It is comprehensive, user friendly and very easy to read and make sense of’ Gillian E Lang, Amazon reviewer The sixth edition of this book reflects significant developments in nursing research in recent years, ensuring the reader is provided with the very latest information on research processes and methods. It continues to explore how to undertake research as well as evaluating and using research findings in clinical practice, in a way that is suitable for both novice researchers and those with more experience. Divided into six sections, the chapters are ordered in a logical fashion that also allows the reader to dip in and out. The first two sections of the book provide a comprehensive background to research in nursing. The third section presents a variety of qualitative and quantitative approaches, both new and well-established. The final three sections then look at collecting and making sense of the resulting data and putting the research findings into clinical practice. Summarises key points at the start of each chapter to guide you through Includes contributions from a wide range of experts in the field Accessible but doesn’t shrink away from complex debates and technical issues New to this edition: Accompanying website (www.wiley.com/go/gerrish) Ten completely new chapters including Narrative Research, Mixed Methods and Using Research in Clinical Practice ‘Research Example’ boxes from a wide variety of research types

The second edition of Patton’s classic text retains the practical advice of the original. It shows how to conduct an evaluation in a way that will be useful -- and actually used. Patton has included new stories, new examples, new research findings, and more of his evaluation humour. He adds to the original book’s insights into the changes in evaluation during the past decade and incorporates recent research on utilization.

Flowcharts teaches how to create and compare different flowcharts that outline the sequence of steps in a process. The information is presented in a straightforward, easy-to-understand manner through a series of exercises and case studies. Users of Plain & Simple Series learn how to select the right tool for the task at hand, collect the right data, interpret the data, and take appropriate action based on their findings.

The third edition of this best-selling text in evaluation incorporates the experience that the authors gained from the many evaluations they have undertaken since the first edition. On more than one occasion they found themselves on opposite sides of the table -- representing different agencies involved in a project. Evaluation has changed much in ten years, and this edition reflects those changes: introduction of microcomputers; econometric modelling; political changes and much more. A companion Workbook has been published in conjunction with this edition.

New edition of a time-tested text/reference first published in 1979, providing an introduction to the broad set of research activities essential for designing, implementing, and appraising the utility of social programs. Chapters cover diagnostic procedures, tailoring evaluations, program monitoring, impact assessment, assessment of full-coverage p.

This text provides a solid foundation in program evaluation, covering the main components of evaluating agencies and their programs, how best to address those components, and the procedures to follow when conducting evaluations. Different models and approaches are paired with practical techniques, such as how to plan an interview to collect qualitative data and how to use statistical analyses to report results. In every chapter, case studies provide real world examples of evaluations broken down into the main elements of program evaluation: the needs that led to the program, the implementation of program plans, the people connected to the program, unexpected side effects, the role of evaluators in improving programs, the results, and the factors behind the results. In addition, the story of one of the evaluators involved in each case study is presented to show the human side of evaluation. This new edition also offers enhanced and expanded case studies, making them a central organizing theme, and adds more international examples. New online resources for this edition include a table of evaluation models, examples of program evaluation reports, sample handouts for presentations to stakeholders, links to YouTube videos and additional annotated resources.
