Organic Chemistry : A Benchtop

...

Pharmaceutical Organic chemistry is the branch of chemistry in which covalent carbon compounds and their reactions are studied. A wide variety of classes of compounds such as drugs, vitamins, insulin, natural and synthetic fibres, as well as carbohydrates, peptides, and fats consist of organic molecules.

Selective cleavage of the B–O bond or B–H bond in HBpin can be achieved by adjusting the pincer ligand of a phosphorus(III) compound guided by a combination of theoretical prediction and experimental verification. Theoretical calculations reveal that a pincer-type phosphorus compound with an $[\text{ONO}]_3^-$ ligand reacts with HBpin, leading to cleavage of the stronger B–O bonds ($\Delta G^\circ = 23 \dots$

Chemoselectivity for B–O and B–H Bond Cleavage by Pincer ...
