It is impossible to read Farmageddon: The True Cost of Cheap Meat without coming to the conclusion that the world 's food and agriculture system is screwed. This is a system that produces enormous quantities of food, yet sees up to a third of that wasted. It 's a highly technological system requiring enormous quantities of oil, pesticides and chemicals to produce vast quantities of food; yet it 's a system that fails to feed the hungry.

Farm animals have been disappearing from our fields as the production of food has become a global industry. We no longer know for certain what is entering the food chain and what we are eating - as the UK horsemeat scandal demonstrated. We are reaching a tipping point as the farming revolution threatens our countryside, health and the quality of our food wherever we live in the world. Farmageddon is a fascinating and terrifying investigative journey behind the closed doors of a runaway industry across the world - from the UK, Europe and the USA, to China, Argentina, Peru and Mexico. It is both a wake-up call to change our current food production and eating practices and an attempt to find a way to a better farming future.

A tour of some of the world's most iconic and endangered species, and what we can do to save them. Climate change and habitat destruction are not the only culprits behind so many animals facing extinction. The impact of consumer demand for cheap meat is equally devastating and it is vital that we confront this problem if we are to stand a chance of reducing its effect on the world around us. · We are falsely led to believe that squeezing animals into factory farms and cultivating crops in vast, chemical-soaked prairies is a necessary evil,

an efficient means of providing for an ever-expanding global population while leaving land free for wildlife · Our planet's resources are reaching breaking point: awareness is slowly building that the wellbeing of society depends on a thriving natural world From the author of the internationally acclaimed Farmageddon, Dead Zone takes us on an eye-opening investigative journey across the globe, focussing on a dozen iconic species one-by-one and looking in each case at the role that industrial farming is playing in their plight. This is a passionate wake-up call for us all, laying bare the myths that prop up factory farming before exploring what we can do to save the planet with healthy food.

Four years ago, journalist Peter Lovenheim was standing in a long line at McDonald ' s to buy a Happy Meal for his little daughter, which would come with a much-desired Teenie Beanie Baby—either a black-and-white cow named “ Daisy ” or an adorable red bull named “ Snort. ” Finding it rather strange that young children were being offered cuddly toy cows one minute and eating the grilled remains of real ones the next, Lovenheim suddenly saw clearly the great disconnect between what we eat and our knowledge of where it comes from. Determined to understand the process by which living animals become food, Lovenheim did the only thing he could think of: He bought a calf—make that twin calves, number 7 and number 8—from the dairy farm where they were born and asked for permission to spend as much time as necessary hanging around and observing everything that happened in the lives of these farm animals. Portrait of a Burger as a Young Calf is the provocative true story of Peter Lovenheim ' s hands-on journey into the dairy and beef industries as he follows his calves from conception to possible consumption. In the process, he gets to know the good, hard-working people who raise our cattle and make milk products, beef, and veal available to consumers like you and me. He supplies us with a “ fly on the wall ” view of how these animals are used to put food on America ' s very abundant tables. Constantly vigilant about wanting to be an observer who never interferes, Lovenheim allows the reader to see every aspect of a cow ' s life, without passing judgment. Reading this book will forever change the way you think about food and the people and animals who provide it for us. From the Hardcover edition.

‘ An extraordinary book ’ Nicholas Evans, author of The Horse Whisperer ‘ Essential reading ’ Philip Lymbery, CEO of Compassion in World Farming and author of Farmageddon The history of humanity ' s relationship with other species is baffling. Without animals there would be no us. We are all fellow travellers on the same evolutionary journey. By charting the love–hate story of people and animals, from their first acquaintance in deep prehistory to the present and beyond, Richard Girling reveals how and where our attitudes towards animals began – and how they have persisted, been warped and become magnified ever since. In dazzling prose, The Longest Story tells of the cumulative influence of theologians, writers, artists, warriors, philosophers, farmers, activists and scientists across the centuries, now locking us into debates on farming, extinction, animal rights, pets, experiments and religion.

New York Times Bestseller: The shadowy world of “ off the books ” businesses—from marijuana to migrant workers—brought to life by the author of Fast Food Nation. America ' s black market is much larger than we realize, and it affects us all deeply, whether or not we smoke pot, rent a risqué video, or pay our kids ' nannies in cash. In Reefer Madness, the award-winning investigative journalist Eric Schlosser turns his exacting eye to the underbelly of American capitalism and its far-reaching influence on our society. Exposing three American mainstays—pot, porn, and illegal immigrants—Schlosser shows how the black market has burgeoned over the past several

decades. He also draws compelling parallels between underground and overground: how tycoons and gangsters rise and fall, how new technology shapes a market, how government intervention can reinvigorate black markets as well as mainstream ones, and how big business learns—and profits—from the underground. “ Captivating . . . Compelling tales of crime and punishment as well as an illuminating glimpse at the inner workings of the underground economy. The book revolves around two figures: Mark Young of Indiana, who was sentenced to life in prison without parole for his relatively minor role in a marijuana deal; and Reuben Sturman, an enigmatic Ohio man who built and controlled a formidable pornography distribution empire before finally being convicted of tax evasion. . . . Schlosser unravels an American society that has ‘ become alienated and at odds with itself. ’ Like *Fast Food Nation*, this is an eye-opening book, offering the same high level of reporting and research. ” —Publishers Weekly

Selected by The New York Times Book Review as a Notable Book of the Year A revelatory tale of science, adventure, and modern myth. When the writer Donovan Hohn heard of the mysterious loss of thousands of bath toys at sea, he figured he would interview a few oceanographers, talk to a few beachcombers, and read up on Arctic science and geography. But questions can be like ocean currents: wade in too far, and they carry you away. Hohn's accidental odyssey pulls him into the secretive world of shipping conglomerates, the daring work of Arctic researchers, the lunatic risks of maverick sailors, and the shadowy world of Chinese toy factories. *Moby-Duck* is a journey into the heart of the sea and an adventure through science, myth, the global economy, and some of the worst weather imaginable. With each new discovery, Hohn learns of another loose thread, and with each successive chase, he comes closer to understanding where his castaway quarry comes from and where it goes. In the grand tradition of Tony Horwitz and David Quammen, *Moby-Duck* is a compulsively readable narrative of whimsy and curiosity.

D is for Desert: A World Deserts Alphabet uses the alphabet to explore desert regions around the world, explaining the science behind what determines a desert and showcasing fascinating features and desert inhabitants. Budding scientists will traverse the rocky deserts of Mongolia astride the Bactrian camel, spy on the poisonous Gila monster and other lizards in the Sonoran Desert, discover geological wonders in Bryce Canyon National Park, and learn about desert weather phenomena such as dust storms and flash floods, and much more. A glossary of key desert-science terms and concepts is included.

From the Publisher: Jonathan Safran Foer spent much of his teenage and college years oscillating between omnivore and vegetarian. But on the brink of fatherhood-facing the prospect of having to make dietary choices on a child's behalf-his casual questioning took on an urgency. His quest for answers ultimately required him to visit factory farms in the middle of the night, dissect the emotional ingredients of meals from his childhood, and probe some of his most primal instincts about right and wrong. Brilliantly synthesizing philosophy, literature, science, memoir and his own detective work, *Eating Animals* explores the many fictions we use to justify our eating habits-from folklore to pop culture to family traditions and national myth-and how such tales can lull us into a brutal forgetting. Marked by Foer's profound moral ferocity and unvarying generosity, as well as the vibrant style and creativity that made his previous books, *Everything is Illuminated* and *Extremely Loud and Incredibly Close*, widely loved, *Eating Animals* is a celebration and a reckoning, a story about the stories we've told-and the stories we now need to tell.
