The Field Description of Metamorphic Rocks by Norman Fry ...

Lab 11: FIELD DESCRIPTION OF METAMORPHIC ROCKS The basic procedural aspects of writing a description for metamorphic rocks or rock units are identical to those for sedimentary rocks and rock units. The main difference is, of course, terminology. With this in mind, today's lab focuses on common terms that are used to describe metamorphic rock textures, fabrics, structures and mineralogy, as well as some working descriptions of commonly used metamorphic rock names.

The Field Description of Metamorphic Rocks: Fry, Norman ...

The short summaries include metamorphic facies, preservation of peak assemblages, metamorphic field gradients, foliation and lineation, chemical flux, and recrystallization. Part 1: Metamorphic rock types Short and useful remarks about the protoliths of each of these rock types lead off these chapters.

A Pictorial Guide to Metamorphic Rocks in the Field ...

Hand specimen descriptions for metamorphic rocks are like those for igneous rocks. The objective is to tell someone looking at it everything they need to know to recognize it in the field. Descriptions should be reasonably comprehensive but clear and succinct, typically no more than two or three sentences. □ Rock color. One color only. After stating the overall rock color, you may then qualify it.

Hand specimen descriptions of metamorphic rocks

The Field Description of Metamorphic Rocks by Fry, Norman ...

In general, color is a good clue to the silica content of extrusive igneous rocks, with basalt being dark and felsite being light. Although geologists would do a chemical analysis before identifying andesite in a published paper, in the field they readily call a gray or medium-red extrusive igneous rock andesite.
