Electronic musicians and composers will create songs or loops only minutes after launching the software with this guide to FL Studio (formerly Fruity Loops), a complete virtual studio application. How to streamline the recording of multitrack musical compositions is explained in order to create complex songs and realistic guitar loops with 32-bit internal mixing and advanced MIDI support. Musicians are then shown how the resulting song or loop can be exported to a WAV/MP3 file and how MIDI events can be exported to a standard MIDI file. Preparing FL Studio for effective work, carrying out the main operations, building patterns in Step Sequencer, creating a melody in the Piano Roll view, and assembling and mixing a composition using Playlist and Mixer are also described.
