LightWave v9 Texturing takes you behind the fine art of surfacing your 3D objects using LightWave 3D. Because many artists find texturing and prepping objects for texturing intimidating or confusing, this book breaks down the process and makes it easier to understand by guiding you through LightWave's powerful surfacing toolset and a number of helpful tutorials. LightWave v9 Texturing also demonstrates how easy it is to create surfaces using LightWave's new, powerful node-based shading system. With this book go beyond texturing theory to find out what makes a great realistic texture; learn how to build textures using both LightWave's classic layer system and the new Node Editor; discover how to unwrap and edit UV maps; find out how to create a variety of surfaces through a series of tutorials; enhance your surfaces with gradients, image maps, and procedural textures."

Light Wave is among the most powerful, complete, and reliable 3D tools in existence. Light Wave has become the visual effects software of choice in the film, television and broadcast industries.

LightWave 3D 7.5 Lighting is the only book on the market from a professional artist that explains the theory and application of lighting with LightWave 3D 7.5. The book discusses everything users need to know about the qualities of light, modern lighting techniques, LightWave's impressive toolset, and lighting design issues.
