Countless collector car owners are skilled at performing mechanical work, but for many of them, electrical work seems like a black art, too complicated and too confusing. However, electrical upgrades are absolutely essential for a high-performance classic car or a modified car to perform at its best. With a firm understanding of the fundamentals, you can take this comprehensive guide and complete a wide range of electrical projects that enhance the performance and functionality of a vehicle. In this revised edition (formerly titled Automotive Electrical Performance Projects) brilliant color photos and explanatory step-by-step captions detail the installation of the most popular, functional, and beneficial upgrades for enthusiasts of varying skill levels. Just a few of the projects included are: maximizing performance of electric fans; installing electronic gauges; upgrading charging systems; and installing a complete aftermarket wiring harness, which is no small task. Each facet is covered in amazing detail. Veteran author Tony Candela, who wrote CarTech's previous best-selling title Automotive Wiring and Electrical Systems, moves beyond the theoretical and into real-world applications with this exciting and detailed follow-up. This Volume 2 is essential for any enthusiast looking to upgrade his or her classic vehicle to modern standards, and for putting all the knowledge learned in Automotive Wiring and Electrical Systems into practice.

Operation IoTopia, a Malaysian thriller novel by Bruce Allsman A white hat hacker has to rescue two of his friends held captive by a mercenary at the behest of his frenemy, a diabolical billionaire technopreneur with a sinister plan. White hat hackers, Din Kamal and his wife, are professional penetration testers, freelance cyber security consultants based in Penang, Malaysia. When Gary Ang, a whistleblower at IoTopia Berhad, secretly copies his employer's top secret data and tries to escape with it, he finds a mercenary pursuing him. While speeding away in his car, realizing the urgency, he uploads to his personal cloud the most important encrypted file and sends Din, the only hacker friend he could trust, a link to the file. During the subsequent high speed car chase across the Penang Second Bridge, Gary crashes his car. He dives into the sea, manages to escape, and calls Din from a budget hotel at Batu Kawan. Unfortunately, the mercenary abducts him just before Din arrives. Later, after failing to decrypt the file he had downloaded, Din realizes the gravity of the situation and enlists the help of Shila, his sister, a cyber crime investigator of the Malaysian government's cyber crime division to track down the mercenary's identity and employer. Further investigations reveal the identity of the mercenary and his employer, the founder and owner of IoTopia Berhad, a billionaire technopreneur from Penang and Din's longtime frenemy. Din enlists the help of Kumar, a hacker friend to hack into IoTopia Berhad's computer servers to uncover more information. Kumar attempts a hack but fails and suffers the same fate as Gary. Consequently, Din organizes a team to help him rescue Gary and Kumar. While formulating the rescue plan they uncover a sinister plot, code-named Operation IoTopia. What is it exactly? What are its true objectives? How will Din and his team mount a rescue operation and foil the sinister plot? Operation IoTopia, a Malaysian #thriller #novel, 181 pages

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.
