allowed for us to see exactly what the outcomes of each cross were and the phenotypes were easily distinguishable.

Determining Acceptance of the 9:3:3:1 Ratio in Fruit Fly ...

The purpose of our fruit fly experiment was to learn about genetics, which is the study of DNA, genes and traits. We also studied mutations, which are the changing of an organism's genes and DNA sequence which makes the organism different than that of its species, and the effects of it on our flies.
