Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life

on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that

happen in forests where we live and play.

Today, our global village is filled with strife, caused primarily by extremists of every kind, all unwilling to compromise. But there is a better way—a middle way—where we might discover common ground for peace, both personally and universally. Lou Marinoff, professor of philosophy and author of *Plato, not Prozac*, reveals the ABCs of finding that spiritually rich path: Aristotle, Buddha, and Confucius. Each of these wise men knew that extremism destroys happiness, health and harmony, and shared the supremely important notion that the main purpose of our existence is to lead a good life, here and now. In three sections, Marinoff examines the contemporary world and

shows how the “ Middle Way ” provides solutions to our most pressing problems. Part One looks at civilizational dynamics that drive both cooperation and conflict across borders, and introduces each of the ABCs. The second segment focuses on some notorious extremes—including political polarization, and simmering religious, tribal, gender, cultural, and economic divides—and how the ABCs can reconcile them. And the third, final section enlightens us on how we all can apply the ABCs to the betterment of our own lives and humanity as a whole. A short list of recommended readings accompanies each chapter, along with illustrations, maps, and eye-opening charts.
