Its purpose has been to prepare future leaders for responsibilities they will face, through lessons drawn from history and the classics. Now Gaddis has distilled that teaching into a succinct, sharp and potentially transformational book, surveying statecraft from the ancient Greeks to Franklin D. Roosevelt and beyond. An unforgettable guide to the art of leadership, *On Grand Strategy* is, in every way, its own master class.

Benjamin Miller instead seeks to account for changes in US international strategy by developing a theory of grand strategy that captures the key security approaches available to US decision-makers in times of war and peace. Grand Strategy from Truman to Trump makes a crucial contribution to our understanding of competing grand strategies that accounts for objectives and means of security policy. Miller puts forward a model that is widely applicable, based on empirical evidence from post-WWII to today, and shows that external factors—rather than internal concerns—are the most determinative.

In *The End of Grand Strategy*, Simon Reich and Peter Dombrowski challenge the common view of grand strategy as unitary. They eschew prescription of any one specific approach, chosen from a spectrum that stretches from global primacy to restraint and isolationism, in favor of describing what America's military actually does, day to day. They argue that a series of fundamental recent changes in the global system, the inevitable jostling of bureaucratic politics, and the practical limitations of field operations combine to ensure that each presidential administration inevitably resorts to a variety of strategies. Proponents of different American grand strategies have historically focused on the pivotal role

One size does not fit all, say the authors—the attempt to impose a single overarching blueprint is no longer feasible. Reich and Dombrowski declare that grand strategy, as we know it, is dead. *The End of Grand Strategy* is essential reading for policymakers, military strategists, and analysts and critics at advocacy groups and think tanks.
