The 2011 F-150 Harley-Davidson special edition truck was a continuation of the 2010 Harley truck. In 2011, the truck again had a unique look with Harley/Ford badging, and you had your choice of two colors; Ingot Silver and Tuxedo Black. Both trucks came with bodyside graphics reminiscent of "speed scallops" used on hot rods.

How the partnership between Ford and the UAW, forged through more than fifty pivotal events, transformed their capacity to combine good jobs with high performance. In 2009, the Ford Motor Company was the only one of the Big Three automakers not to take the federal bailout package. How did Ford remain standing when its competitors were brought to their knees? It was a gutsy decision, but it didn't happen in isolation. The United Auto Workers joined with Ford to make this possible—not only in 2009, but in a series of more than fifty pivotal events during three decades that add up to a transformation that simultaneously values work and delivers results. The pivotal events—some planned and some unplanned; some at the facility level and some at the enterprise level –were not all successful. All had the potential, however, to further the transformation, and all provide insight into how large-scale system change really happens. The authors—each with years of experience with Ford, the UAW, and the industry—provide an unprecedented inside look at how core operating assumptions are shifted and at the emergence of integrated operating systems for quality,

safety, and other aspects of the enterprise. It is a transformation built on a foundation of dignity and mutual respect, guided by a vision of combining good jobs with high performance.

In July 1917 Ford Motor Company introduced a one-ton chassis for commercial trucks, marking what many historians feel was its official entry into the dedicated truck business. Prior to this the company had offered commercial cars, including depot hacks and delivery van bodies mounted on its standard passenger car chassis. Dealers had also offered small after-market pickup beds that could be placed on the rear of a Model T car to convert it to a pickup. But with the debut of the rugged Model TT truck chassis, Ford was firmly in the truck market. Eight years later it introduced its first factory-produced pickup, a sturdy half-ton job that met with great acceptance. During the century that has passed since that first Ford truck chassis, the F-series has become the best-selling truck in the world, and the best-selling vehicle of any type in America. Every year the company sells over 700,000 F-series trucks, and well over 1.5 million trucks of all types, just in the U.S. It's an amazing success. Ford Tough: 100 Years of Ford Trucks tells the entire Ford truck story from the very beginning, when Ford got its start in truck production. This book provides the history of the wide array of models Ford has built over the past century, including the Model A roadster pick-up, stylish 81C pickups, legendary 1948 F-1, Bronco, Courier, Ranchero, Econoline.
