Hematoma Arm Manual Guide Apply ice or cool packs to your arm for the first 24 hours. o. Apply heat to the area 24 hours after the hematoma occurred. use a heating pad at the lowest setting for 15 minutes one or more times per day. apply a warm, moist washcloth to the area, covered with plastic wrap to retain heat one or more times per day. o.

~~Hematoma Arm Manual Guide - atcloud.com~~

Hematoma is a condition in which the blood accumulates beneath the skin. It may appear as a bruise. This condition is often caused by a body injury that causes blood vessels to rupture and bleed. Large hematoma can be dangerous because the pressure of blood vessels can squeeze blood vessels and block blood flow.

Hematoma is generally defined as a collection of blood outside of blood vessels. Most commonly, hematomas are caused by an injury to the wall of a blood vessel, prompting blood to seep out of the blood vessel into the surrounding tissues. A hematoma can result from an injury to any type of blood vessel (artery, vein, or small capillary).
