How did hominids arrive in the western hemisphere? | Study.com

However, a recent study has shown that although the 'wet' phase holds up for Sapiens' early migration into the Levant and Arabia between roughly 120,000-90,000 years ago, during the time of the main migration (around 55,000 years ago) the Horn of Africa was actually really dry, arid, and a bit colder. This may, then, have helped push the main wave out.
