In grade school, she always had her nose in a book. In junior high, the other kids thought she was weird, because she actually liked reading those dusty old novels in literature class. All through high school, Goldilocks dreamed of writing a book of her own someday. But when she went to college, her parents persuaded her to study something practical. Goldilocks hated practical, and secretly she kept reading novels. But she was a very obedient girl, so she did what her parents told her. She got a very practical degree in marketing. After college, she got a job that bored her to tears—but at least it was practical. Then she got married, and within a few years, she had two children, a girl and then a boy. She quit her job to devote full time to them. As the children grew, Goldilocks took great joy in introducing them to the stories she had loved as a child. When her son went off to kindergarten, Goldilocks thought about looking for a job. But her resume now had a seven-year hole in it, and her practical skills were long out of date. The only jobs Goldilocks could qualify for were minimum wage. She suddenly realized that being practical had made her horribly unhappy. On a whim, Goldilocks decided to do the one thing she had always wanted more than anything else—she was finally going to write a novel. She didn't care if it was impractical. She didn't care if nobody would ever read her novel. She was going to do it just because she wanted to. For the first time in years, she was going to do something just for herself. And nobody was going to stop her.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

"Outstanding, highly recommended! Eric Penz's fast-paced novel, with its micro-textbook on Gigantopithecus, was an easy pick for my Top Books of 2005." -Loren Coleman, author of Bigfoot! The True Story of Apes in America. The line between history and legend can be deceptively thin-too thin perhaps to maintain the claim that one is exclusively fact and one fiction. Such may be the case with the history of Lewis and Clark. For the fact is that two hundred years after they were handpicked by Thomas Jefferson to lead an extraordinary expedition to the Pacific coast legends still persist regarding unexplained gaps in the explorers' field journals. Call it legend, call it history, Cryptid tells the riveting story of conspiracy theorists who have new evidence of a centuries-old cover-up. When a cryptozoologist, a paleontologist, and a Jefferson descendant begin connecting the dots, they threaten to do more than unveil the well-guarded scientific discovery that lies at the heart of the ancient secret; they threaten to rewrite American history. That is if they can survive a conspiracy that dates back to the Founding Fathers-the very same that haunted Lewis to his grave. It may be that one of our nation's first secrets is still being kept. Cryptid illustrates how the human act of seeking the truth can be the very element that destroys it. Two centuries in the making, Cryptid is the final chapter of the Lewis and Clark story. And, as with any good tale, the best secrets have been kept until the end.
