This project investigates the implications of technology on identity in embodied performance, exploring the interrelationship of & between identities in performance practices & considering how identity is formed, deformed, blurred & celebrated within diverse approaches to technological performance practice.

This book reflects on the aftermath of shifts encountered in the maturing of digital culture in areas of critical theory and artistic practices, focusing on the awareness that contemporary subjectivity is one that dwells within both the virtual and the real.

This trans-historical collection explores

analogue performance technologies from Ancient Greece to pre-Second World War. From ancient mechanical elephants to early modern automata, Enlightenment electrical experiments to Victorian spectral illusions, this volume offers an original examination of the precursors of contemporary digital performance.

Consisting of critical analyses, theoretical provocations and practical reflections by leading scholars/practitioners from the fields of performance studies, live art and creative technology, these essays examine the rise of intimate performance works and question the socio-historical contexts provoking those aesthetic and affective developments.

This project investigates the implications of technology on identity in embodied performance, opening up a forum of debate exploring the interrelationship of and between identities in performance practices and considering how identity is formed, deformed, blurred and celebrated within diverse approaches to technological performance practice.

This book presents a Facebook study on members of the Cusp Generation, or those born before the “great digital divide” of 1995. This delineation allows for a discussion on the possible socio-cultural implications of Facebook use for people of all ages. Members of the Cusp Generation are in a unique position as “part digital natives” to easily acquire and use new media technologies, while being more

critically aware of the personal, social, and cultural effects that may arise from them thanks to having some memory of the pre-digital era. Drawing on identity theories rooted in critical theory and cultural studies, the author shows that there are potential constrictions on people's agency in their Facebook use caused by consumer discourse, Facebook's hyperreal nature and structure, psychological predispositions, and the potential for avatar attachment. In raising concerns over the impacts of technology-based communication, this book explores how the medium of Facebook extends and exacerbates processes of offline social reproduction and discusses how the positive social and political aspects of Facebook can be enhanced. The findings contribute to academic

This book constitutes the refereed proceedings of the IFIP WG 8.2 Working Conference on Information Systems and Organizations, IS&O 2016, held in Dublin, Ireland, in December 2016. The 12 revised full papers presented were carefully reviewed and selected from 75 submissions. The papers are organized in the following topical sections: doing process research; exploring affect and affordance; considering communication and performance; and examining knowledge and practice.

This book is the first full-length monograph to focus on Punchdrunk, the internationally-renowned theatre company known for its pioneering approach to immersive theatre. With its promises of empowerment, freedom and experiential joy, immersive theatre continues to gain popularity - this study brings necessary critical analysis to this rapidly developing field. What exactly do we mean by audience “immersion”? How might immersion in a Punchdrunk production be described, theorised, situated or politicised? What is valued in immersive experience - and are these values explicit or implied? Immersive Theatre and Audience Experience draws on rehearsals, performances and archival access to Punchdrunk, providing new critical perspectives

from cognitive studies, philosophical aesthetics, narrative theory and computer games. Its discussion of immersion is structured around three themes: interactivity and game; story and narrative; environment and space. Providing a rigorous theoretical toolkit to think further about the form's capabilities, and offering a unique set of approaches, this book will be of significance to scholars, students, artists and spectators.

Digital Practices offers a description of a range of art and performance practices that have emerged within the context of a broad-based technological infiltration of all areas of human experience. They are integral to alternative and also to mainstream performance and culture, and demand perceptive strategies that can address

the interface between the physical and the virtual. In this pioneering study, Susan Broadhurst explores the aesthetic theorisation of these practices and extends her analysis to include other approaches, including those offered by recent research into neuroesthetics.

Why should the digital bring about ideas of progress in the theatre arts? This question opens up a rich seam of provocative and original thinking about the uses of new media in theatre, about new forms of cultural practice and artistic innovation, and about the widening purposes of the theatre's cultural project in a changing digital world. Through detailed case-studies on the work of key international theatre companies such as the Elevator Repair Service and The Mission
