The Baltics are about to be thrust onto the world stage. With a 'belligerent' Vladimir Putin to their east (and 'expansionist' NATO to their west), Estonia, Latvia and Lithuania are increasingly the subject of unsettling headlines in both Western and Russian media. But how real are these fears, subject as they are to media embellishment, qualification and denial by both Russia and the West? What do they mean for those living in the Baltics - and for the world? Based on her extensive research and work as a journalist, Aliide Naylor takes us inside the geopolitics of the region. Travelling to the heart of Estonia, Latvia and Lithuania she explores modernity in the region that birthed Skype, investigates smuggling and reports of troop movements in the borderlands, and explains the countries' unique cultural identities. Naylor tells us why the Baltics matter, arguing persuasively that this region is about to become the new frontline in the political struggle between East and West.

In the Shadow of My Truth is the second book in the series on Clan Douglas and Scotland's Wars for National Independence. The year was 1306; Scotland needed a revolution, a new king to lead her subjects to freedom. Robert Brus answered the call. James Douglas joined him. This is the true story of the Good Sir James, one of Scotland's most beloved knights. It is also the tale of a widow's struggle to revenge her husband's martyred end. Eleanora Lovaine Douglas inspired her three sons to greatness, instilling her husband's teachings and core values in her children; fulfilling her death bed promise to her loving husband, continuing the fight for Scotland to rid their homeland of Edward's tyranny forever.

An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements, with updated country case studies. Comparative economics, with its traditional dichotomies of socialism versus capitalism, private versus state, and planning versus market, is changing. This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field. This new edition examines a wide variety of institutional and systemic arrangements, many of which reflect deep roots in countries' cultures and histories. The book has been updated and revised throughout, with new material in both the historical overview and the country case studies. It offers a broad survey of economic systems, then looks separately at market capitalism, Marxism and socialism, and "new traditional economies" (with an emphasis on the role of religions, Islam in particular, in economic systems). It presents case studies of advanced capitalist nations, including the United States, Japan, Sweden, and Germany; alternative paths in the transition from socialist to market economies taken by such countries as Russia, the former Soviet republics, Poland, China, and the two Koreas; and developing countries, including India, Iran, South Africa, Mexico, and Brazil. The new chapters on Brazil and South Africa complete the book's coverage of all five BRICS nations; the chapter on South Africa extends the book's comparative treatment to another continent. The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues. Each chapter ends with discussion questions.

How interactions of race and religion have influenced unity and division in the church At the center of the story of American Christianity lies an integral connection between race relations and Christian unity. Despite claims that Jesus Christ transcends all racial barriers, the most segregated hour in America is still Sunday mornings when Christians gather for worship. In Slavery's Long Shadow fourteen historians and other scholars examine how the sobering historical realities of race relations and Christianity have created both unity and division within American churches from the 1790s into the twenty-first century. The book's three sections offer readers three different entry points into the conversation: major historical periods, case studies, and ways forward. Historians as well as Christians interested in racial reconciliation will find in this book both help for understanding the problem and hope for building a better future. Contributors: Tanya Smith Brice Joel A. Brown Lawrence A. Q. Burnley Jeff W. Childers Wes Crawford James L. Gorman Richard T. Hughes Loretta Hunnicutt Christopher R. Hutson Kathy Pulley Edward J. Robinson Kamilah Hall Sharp Jerry Taylor D. Newell Williams

CMJ New Music Report is the primary source for exclusive charts of non-commercial and college radio airplay and independent and trend-forward retail sales. CMJ's trade publication, compiles playlists for college and non-commercial stations; often a prelude to larger success.

Around 1980, G. Mason announced the classification of a certain subclass of an important class of finite simple groups known as "quasithin groups". The classification of the finite simple groups depends upon a proof that there are no unexpected groups in this subclass. Unfortunately Mason neither completed nor published his work. In the Main Theorem of this two-part book (Volumes 111 and 112 of the AMS Mathematical Surveys and Monographs series) the authors provide a proof of a stronger theorem classifying a larger class of groups, which is independent of Mason's arguments. In particular, this allows the authors to close this last remaining gap in the proof of the classification of all finite simple groups. An important corollary of the Main Theorem provides a bridge to the program of Gorenstein, Lyons, and Solomon

(AMS Mathematical Surveys and Monographs, Volume 40) which seeks to give a new, simplified proof of the classification of the finite simple groups. Part II of the work (this volume) contains the proof of the Main Theorem, and the proof of the corollary classifying quasithin groups of even type. Part I (Volume 111) contains results which are used in the proof of the Main Theorem. Some of the results are known and fairly general, but their proofs are scattered throughout the literature; others are more specialized and are proved here for the first time.

Years ago, young John Maxwell Harrison saved little Delaney Wainwright from drowning, forging a psychic bond that would endure for years. And when the pair are reunited in the wake of Delaney's husband's suspicious death, that bond may be the only thing that can save them-and the unrequited love they shared.

Before captivating America as Morticia in *The Addams Family*, actress Carolyn Jones appeared in 30 movies (including starring roles with Elvis Presley and Frank Sinatra) and had a decade-long marriage to producer Aaron Spelling. But the road to Hollywood from her native Amarillo, Texas, was studded with rejection, typecasting, and unwanted comparisons to an actress who hated her: Bette Davis. Author James Pylant unveils the real Carolyn Jones, with access to her personal correspondence and journal, as well as interviews with her family, friends and fellow actors. What emerges is an intimate portrait of the iconic actress, a consummate professional who created a mystique not only for Morticia but for herself.--Website.

Sean Easton is a twenty-five year old disenchanted college grad who just rediscovered his love for video games, which is only exceeded by his love for weed and alcohol. Lauren Gallo's a twenty-four year old college dropout turned working mother, who's just walked in on her husband (and the father of her two year old son) having sex with another woman in their apartment. Sean meets Lauren. Lauren meets Sean. Then their real stories begin. Together, Sean and Lauren represent a large portion of our society, a generation of individuals entering their mid- and late-twenties in the new millennium. Many of them have been told to dream big and aim high, that the next four years will be the best of their lives (a depressing thought). A few of them fulfill these dreams. Most don't, and in a time when acquiring a college degree has become more an expectation than an accomplishment, Sean Easton and Lauren Gallo must break the mold society's set in front of them if they ever hope to achieve true happiness.

The world's Indigenous communities are fighting to live and dying too young. In this vital and incisive work, Tanya Talaga explores intergenerational trauma and the alarming rise of youth suicide. From Northern Ontario to Nunavut, Norway, Brazil, Australia, and the United States, the Indigenous experience in colonised nations is startlingly similar and deeply disturbing. It is an experience marked by the violent separation of Peoples from the land, the separation of families, and the separation of individuals from traditional ways of life — all of which has culminated in a spiritual separation that has had an enduring impact on generations of Indigenous children. As a result of this colonial legacy, too many communities today lack access to the basic determinants of health — income, employment, education, a safe environment, health services — leading to a mental health and youth suicide crisis on a global scale. But, Talaga reminds us, First Peoples also share a history of resistance, resilience, and civil rights activism, from the Occupation of Alcatraz led by the Indians of All Tribes, to the Northern Ontario Stirland Lake Quiet Riot, to the Standing Rock protests against the Dakota Access Pipeline, which united Indigenous Nations from across Turtle Island in solidarity. *All Our Relations* is a powerful call for action, justice, and a better, more equitable world for all Indigenous Peoples.
