On the other hand, inpatient coding, which is reimbursed under Medicare Part A, is used to report diagnoses and services where the patient must stay at the facility long term in order to recover and/or receive further treatment. Like outpatient coding, it also uses ICD-10-CM to track diagnoses, but it employs ICD-10-PCS to report procedures.

Inpatient Vs. Outpatient Coding - Medical Management ...

Inpatient – If the signs and symptoms are presented by the physician as a primary diagnosis then they do not need to be coded in inpatient files. If, however, the symptoms seem to be part of a definitive diagnosis, they can be coded. Outpatient – The problem with outpatient procedures is that so many of them lack an actual diagnosis. With that being the case, it is more acceptable for them to use signs and symptoms for coding purposes.

Billing and Coding: Inpatient vs. Outpatient

guidelines that correspond to the chapters as they are arranged in the classification. Section II includes guidelines for selection of principal diagnosis -outpatient settings. Section III for non includes guidelines for reporting additional diagnoses in non- outpatient settings. Section IV is for outpatient coding and reporting.

FY2020 ICD-10-CM Guidelines

Inpatient and outpatient coding, although similar in theory, are very different. Services performed in either setting are reported using different code sets and guidelines. Services are paid differently, as well. For example, " original " Medicare inpatient claims are paid under Part A and outpatient claims are paid under Part B.
