tools to improve your development process. "Instant Testing with
QUnit" is a hands-on guide that will help you achieve beneficial
automated testing with QUnit and its plugins.

Instant Testing with QUnit
Instant Testing with QUnit QUnit.test("hide method", function(
assert){ // Stub assertion assert.ok(true); }); QUnit.test(
"validateInput method", function(assert){ // Stub assertion
assert.ok(true); }); Repeat the flow for the ResetPasswordForm
constructor.

Instant Testing With Qunit [j0vm65d6vr0x]
Test the two identical objects with deep equality assertions. At this
point, we have tried the entire core QUnit assertion methods.
However, QUnit API also includes helper methods deepEqual and
notDeepEqual that allow you to assert on the equality of complex
types such as arrays, objects, regular expressions, dates, and
functions. This is useful when you need to compare two identical
objects.
