Introduction To Landscape Architecture provides an original, visual approach to the study of landscape architecture by creating a spatial morphology based on use and experience of landscapes. It explores aesthetic, spatial and experiential concepts by providing a structure through which landscapes can be

understood and
conceived in design.
'Fabric' is the integrated
structure of whole
landscapes, while 'form'
refers to the components
that make up this fabric.
Together form and
fabric create a
morphology of
landscape useful for the
development of visual-
spatial design thinking
