requirements for the CPA Exam, giving the candidate maximum flexibility in planning their course of study, and success.

In the last half of the 20th Century, the world economy has benefited from a globalization process driven by the enlightened confluence of technology, innovation, trade, and foreign direct investment. This book broadens our understanding of that process. Opening with a review of current global economic metrics and the significant differences between advanced and developing nations, the book goes on to discuss the globalization paradigm and the forces driving it. Discussing the importance of new ideas and new technology in continued economic growth, the volume shows how the protection of intellectual property encourages innovation. Also Page 16/24

covering the evolution of international trade, the book reviews trade distortions from both external and internal sources, comparing trade on a multilateral, nondiscriminatory basis with alternative trade practices, such as free trade and custom unions. The work also reviews the origins and functions of the new World Trade Organization. Describing the rapidly growing practice of foreign direct investment, the book shows how FDI is closely linked to international trade and concludes with a review of the important function FDI can play in the bundling and delivery of the resources required for accelerated economic development of the emerging world.

The economic futures of the United States, Canada, and Japan are tightly linked by the extremely powerful trade network these nations share. Yet because of trade

Page 17/24

and domestic policies aimed at preserving economic and, some argue, cultural integrity, there has at times been considerable friction among the three nations. Much of the recent trade animus of the U.S. has been aimed Japan, the country with the largest trade surplus with the United States. Canada, the largest trade partner of the U.S., maintains fiscal policies which resemble those of Japan, but has not been the focus of similar concern. Since the actions of each nation reverberate throughout the network, a full and accurate understanding of these complex relations will be essential if ongoing trade negotiations, policymaking, and international relations are to be constructive. The papers in this volume were developed from a conference that addressed the need to discover which structural determinants and policies shape the close economic ties among these

nations. Leading experts on trade and macroeconomics from all three countries examine disproportionate saving rates, exchange rate volatility, varying industrial policies and levels of financial innovation, the effects of present tax policies and proposed reforms, and the dynamism of major Pacific nations and the leadership role Japan may play in U.S. relations with that region. Several important conclusions are reached by the contributors. They assert that Japan's trade barriers are relatively low overall and are comparable to those maintained by the United States and Canada, and that divergent fiscal policies have been the major source of macroeconomic imbalances between the United States and other major countries in the 1980s. They also conclude that current trade imbalances may persist for some time. The analyses offered here are likely to prove influential in future policymaking Page 19/24

and will be of interest to a wide audience, including academic economists, government officials, and students of theoretical and policy issues of international trade, investment, and finance.

Solid guidance for managers and trustees to better position their nonprofits now and in the future The Great Recession has left a paradigm shift for nonprofit leadership and their board members as fiduciaries. It has changed how boards make, evaluate and document investment decisions, the risks they are willing to take and the way these details are communicated to donors. Nonprofit Investment and Development Solutions + Website will provide solid guidance for nonprofit leadership, staff and volunteers to better position their

nonprofits to thrive now and in the future. This guide will provide: Sophisticated investment and development principles that are easily understandable and adaptable Specific steps to take in order to avoid unnecessary investment risk and secure financial stability Solutions and techniques for capitalizing on opportunities created by funding shifts and evolving donor expectations Principles and practices of fiduciary responsibility, behavioral finance, socially responsible investing, strategic development planning and charity efficiency In addition, Nonprofit Investment and Development Solutions + Website offers a web site resource with a variety of online tools and templates to help readers implement key concepts discussed in this book.

A positive agenda for achieving the Sustainable Development Goals by 2030 All 193 member nations of the United Nations agreed in September 2015 to adopt a set of seventeen "Sustainable Development Goals," to be achieved by 2030. Each of the goals lin such areas as education and health car lis laudable in and of itself, and governments and organizations are working hard on them. But so far there is no overall, positive agenda of what new things need to be done to ensure the goals are achieved across all nations. In a search of fresh approaches to the longstanding problems targeted by the Sustainable Development Goals, the Japan International Cooperation Agency and the Global Economy and Development program at Brookings mounted a collaborative research effort to Page 22/24

advance implementation of Agenda 2030. This edited volume is the product of that effort. The book approaches the UN's goals through three broad lenses. The first considers new approaches to capturing value. Examples include Nigeria's first green bonds, practical methods to expand women's economic opportunities, benchmarking to reflect business contributions to achieving the goals, new incentives for investment in infrastructure, and educational systems that promote cross-sector problem solving. The second lens entails new approaches to targeting places, including oceans, rural areas, fastgrowing developing cities, and the interlocking challenge of data systems, including geospatial information generated by satellites. The third lens focuses on updating governance, broadly defined. Issues include how civil society can align with the SDG challenge; how an advanced Page 23/24

economy like Canada can approach the goals at home and abroad; what needs to be done to foster new approaches for managing the global commons; and how can multilateral institutions for health and development finance evolve.
