The key for Derrida is the breaking of the tablets; the moment of rupture within god himself that allows for differentiation and the human speech-act (and human "writing"). Out of rupture evolves a poetic-autonomy of subjectivity which works toward consecration through "writing".

First published in 1967, Writing and Difference, a collection of Jacques Derrida's essays written between 1959 and 1966, has become a landmark of contemporary French thought. In it we find Derrida at work on his systematic deconstruction of Western metaphysics. The book's first half, which includes the celebrated essay on Descartes and Foucault, shows the development of Derrida's method of deconstruction. In these essays, Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought—one of his main targets being the way in which "structuralism" unwittingly repeats metaphysical concepts in its use of linguistic models. The second half of the book contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language, finally showing metaphysics to be constituted by this exclusion. These essays on Artaud, Freud, Bataille, Hegel, and Lévi-Strauss have served as introductions to Derrida's notions of writing and différence—the untranslatable formulation of a nonmetaphysical "concept" that does not exclude writing—for almost a generation of students of literature, philosophy, and psychoanalysis. Writing and Difference reveals the unacknowledged program that makes thought itself possible. In analyzing the contradictions inherent in this program, Derrida foes on to develop new ways of thinking, reading, and writing—new ways based on the most complete and rigorous understanding of the old ways. Scholars and students from all disciplines will find Writing and Difference an excellent introduction to perhaps the most challenging of contemporary French thinkers—challenging because Derrida questions thought as we know it.

Writing and Difference is widely perceived to be an excellent starting place for those new to Derrida and this Reader's Guide is the perfect accompaniment to the study of one of the most important philosophical works of the 20th Century.

"In this densely imbricated volume Derrida pursues his devoted, relentless dismantling of the philosophical tradition, the tradition of Plato, Kant, Hegel, Nietzsche, Husserl, Heidegger—each dealt with in one or more of the essays. There are essays too on linguistics (Saussure, Benveniste, Austin) and on the nature of metaphor ("White Mythology"), the latter with important implications for literary theory. Derrida is fully in control of a dazzling stylistic register in this book—a source of true illumination for those prepared to follow his arduous path. Bass is a superb translator and annotator. His notes on the multilingual allusions and puns are a great service."—Alexander Gellley, Library Journal

Limited Inc. is a major work in the philosophy of language by the celebrated French thinker Jacques Derrida. The book's two essays, 'Limited Inc.' and 'Signature Event Context,' constitute key statements of the Derridean theory of deconstruction. They are perhaps the clearest exposition to be found of Derrida's most controversial idea.

"The English version of Dissemination [is] an able translation by Barbara Johnson Derrida's central contention is that language is haunted by dispersal, absence, loss, the risk of unmeaning, a risk which is starkly embodied in all writing. The distinction between philosophy and literature therefore becomes of secondary importance. Philosophy vainly attempts to control the irrecoverable dissemination of its own meaning, it strives—against the grain of language—to offer a sober revelation of truth. Literature—on the other hand—flaunts its own meretriciousness, abandons itself to the Dionysiac play of language. In Dissemination—more than any previous work—Derrida joins in the revelry, weaving a complex pattern of puns, verbal echoes and allusions, intended to 'deconstruct' both the pretension of criticism to tell the truth about literature, and the pretension of philosophy to the literature of truth."—Peter Dewes, New Statesman

An advocate of the rhetorical approach to the study of language criticizes Husserl's theories based on the logical approach

Michel Foucault refers to 1965-1970 as, in philosophical terms, 'the five brief, impassioned, jubilant, enigmatic years'. This book reinterprets Jacques Derrida's work from this period, most especially in L'Écriture et la Différence (Writing and Difference), and argues that a transformation takes place here which has been marginalized in readings of his work to date. Irwin follows with a look at how the 'grammatological opening' becomes crucial for Derrida's work in the 1970s and beyond, incorporating one of his last readings of embodiment from 2000. By drawing our attention to the politics of desire and sexuality, this groundbreaking book engages with the work of key continental theorists, including Artaud, Bataille, Nietzsche, Heidegger, Habermas and Cixous, whilst also examining Derrida's relationship with Plato and feminist theory. It will appeal to a wide range of readers within the social sciences and philosophy, particularly those with interests in gender and sexuality, social theory, continental thought, queer studies and literary theory.
