The first comprehensive study on the aesthetics of domestic architecture in Japan since the Second World War.

Le Rolex Learning Center, basé sur le campus de l'Ecole polytechnique fédérale de Lausanne (EPFL), a été inauguré en 2010. Conçu par les fameux architectes de Tokyo Kazuyo Sejima + Ryue Nishizawa / SANAA, ce bâtiment est vite devenu l'une des oeuvres d'architecture contemporaine les plus visitées de Suisse. Les défis techniques inhérents à sa construction sont nombreux, et sa structure complexe et originale a conduit les ingénieurs à développer des solutions techniques innovantes. Ce livre richement illustré présente une sélection des travaux de huit photographes suisses et internationaux; il montre comment le Rolex Learning Center a été imaginé et comment les usagers se le sont approprié. The Rolex Learning Center on the campus of EPFL in Lausanne was inaugurated in 2010. Designed by the noted Tokyo firm Kazuyo Sejima + Ryue Nishizawa / SANAA, the building has since become one of the most visited works of contemporary architecture in Switzerland.The list of technical challenges inherent in the construction is extensive: its original and complex structure compelled the building engineers to come up with innovative solutions. Based on a selection of the work of eight noted photographers, this generously illustrated volume also explains how the Rolex Learning Center was imagined and how it is used today.

Learn the art of Japanese gardening with this classic, fascinating text. The Sakuteiki, or "Records of Garden Making," was written nearly one thousand years ago. It is the oldest existing text on Japanese gardening-or any kind of gardening-in the world. In this edition of the Sakuteiki the authors provide an English-language translation of this classic work and an introduction to the cultural and historical context that led to the development of Japanese gardening. Central to this explanation is an understanding of the sacred importance of stones in Japanese culture and Japanese garden design. Written by a Japanese court noble during the Heian period (794-1184), the Sakuteiki includes both technical advice on gardening-much of which is still followed in today's Japanese gardens-and an examination of the four central threads of allegorical meaning, which were integral features of Heian-era garden design. For those seeking inspiration to build a rock garden or just better understand the Japanese stone garden, the Sakuteiki is an enduring classic.

Published in conjunction with an exhibition at The Museum of Modern Art, A Japanese Constellation focuses on the work of a small group of architects and designers influenced by and gravitating around the architect Toyo Ito and the architectural firm SANAA. Beginning with an overview of Ito's career and his influence as a mentor to a new generation of Japanese architects, the catalogue presents a richly illustrated portfolio of recent works by three generations of internationally acclaimed designers, including Sou Fujimoto, Akihisa Hirata, and Junya Ishigami. A Japanese Constellation reveals a network of influence and cross-pollination that has become particularly relevant at the start of the 21st century. Essays by curators, architectural historians, and critics reflect on the transmission of an architectural sensibility, and suggest an alternative model to what has been commonly described as an individuality-based "star-system" in architecture. Offering a panorama of interlinked settled or up-and-coming stars, the publication reveals how shared architectural themes travel across generations of architects, creating a strong identity for a regional practice with global impact.

Japan is becoming a popular travel destination for more and more architects today. With its wide variety of architecture, it is both a source of fascination and inspiration. Over a number of years, the review Detail has been consistently documenting the construction activities which have taken place in Japan, and this book draws on the best of their experience and connections to present and analyse with plans and details the most interesting buildings from various architectural trends in contemporary Japan, including Ando's Museum for Contemporary Art in Naoshima, Toyo Ito's Mediathek, a residential building by Kazuyo Sejima, and a temple gallery in Kyoto by Takashi Yamaguchi. Introductory essays discuss the developments in Japanese architecture, and together with portraits of not only well-known Japanese architects and offices, but also young offices such as Atelier Bow Wow, this volume provides a stimulating discussion of current Japanese building in the context of traditional architecture.

In 1995, Toyo Ito's competition project revealed a new structural prototype (or archi-type) which expressed the will to incorporate the notions of mobility and fluidity into space and structure. This book presents the process of design and construction of this prototype since then.

This beautiful guide to Tokyo's most exciting art galleries is a must-read for art lovers planning trips to Tokyo or looking to understand the art scene in contemporary Japan. In-depth interviews with curators and essays by leading art critics bring these exciting art spaces to life for an English-speaking audience.
