Empowering English Language Learners showcases strategies of those who teach English as a second language in pre-schools, graduate schools, secular public schools, and private Christian schools. What makes this book unique is the way each teacher evaluates teaching strategy through personal experience. This book explains what works and what doesn't. With additional contributions from: Dean Borgman Julia Davis Jean Dimock Cherry Gorton Seong Park Olga Soler Virginia D. Ward Gemma Wenger

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Focusing on educational leadership and school administration, offers over six hundred alphabetically arranged entries covering theories, terms, concepts, and histories.

This volume comprises a broad interdisciplinary examination of the many different approaches by which contemporary scholars record our history. The editors provide a comprehensive overview through thirty-eight chapters divided into four parts: a) Historical Culture and Public Uses of History; b) The Appeal of the Nation in History Education of Postcolonial Societies; c) Reflections on History Learning and Teaching; d) Educational Resources: Curricula, Textbooks and New Media. This unique text integrates contributions of researchers from history, education, collective memory, museum studies, heritage, social and cognitive psychology, and other social sciences, stimulating an interdisciplinary dialogue. Contributors come from various countries of Northern and Southern America, Europe and Asia, providing an international perspective that does justice to the complexity of this field of study. The Palgrave Handbook of Research in Historical Culture and Education provides state-of-the-art research, focussing on how citizens and societies make sense of the past through different ways of representing it.
