percolation are
extraction
methods.

Maceration

involves soaking or
steeping. On the
other hand,
percolation
involves filtration
through a porous
material.

Therefore, this is
the key difference
between

Download

Ebook

maceration and percolation. Both methods facilitate the extraction of desired substances from a mixture.

[Difference Between Maceration and Percolation | Compare ...](#)

Natural medicines were the only option for the

Download

Ebook

prevention and treatment of human diseases for thousands of years.

Natural products are important sources for drug development. The amounts of bioactive natural products in natural medicines are always fairly low.

Today, it is very

Download

Ebook

crucial to develop effective and selective methods for the extraction and isolation of those bioactive natural products.

Techniques for extraction and isolation of natural

...

In percolation process there are 3

main stages. a.

Imbibition : The powdered drug is moistened with some of the menstrum and allowed to stand for 4 hours. During this time the drug swells and the menstrum penetrates the cell walls. b.

Maceration :- The

Download

Ebook

moistened drug is left in contact with the menstrum for 24 hours. During this time the menstrum is saturated with the soluble constituents of durg.
