Firefighters who want to advance must be skilled not only on the fireground, but in the assessment center as well. In "Assessment Center Strategy and Tactics", Deputy Chief Michael A. Terpak provides a comprehensive approach to the assessment process. A veteran firefighter and fire officer with over 30 years' experience in one of the nation's most congested and busiest cities, Deputy Chief Terpak includes step-by-step test preparation, scoring strategies, and test-taking tips as well as study cues for exercises that involve structure fires, hazardous material incidents, structural collapse, and beyond. This important new book is designed to serve many purposes in the fire service, ranging from being a starting point and refresher guide for firefighters seeking promotions at any level, to being a field operational guide for on-scene Incident Commanders and Company Officers. It offers an easy-to-follow, step-by-step action plan for firefighters working in Acting Capacities, and can be used when developing SOPs, and when organizing and planning training evolutions. It is definitely a book every firefighter, officer, and aspiring officer will want to own!

Promotional opportunities in the fire service can change your life as well as your career. Being fully prepared can help you advance to a higher rank, and even determine the type of retirement you will receive. By following the advice outlined in Facing the Promotional Interview, you can present yourself to the exam board with confidence and skill.

The Assessment Center process is the best method for identifying management potential in candidates and whether they can demonstrate a talent for planning and organizing, and possess the necessary judgment, communication skills and decision-making ability to move up the ranks. Many candidates do possess these abilities, but they have not learned how to apply them. This book will teach you how to use all your potential. Law enforcement officers are often confused, afraid, nervous or just plain curious about what they will experience when they go through the process. Most books on the assessment center process cover primarily its history, the skill dimensions, a description of the process and provide a few sample exercises. What makes this book different is that it provides an experiential approach to preparing for an assessment center by including numerous

practice exercises, experiential learning, role player scripts, sample detailed Assessor Guides, and information from an experienced professional who has a 360-degree view of assessment center processes. By practicing these exercises, the reader will learn a great deal about their potential and abilities. The organization of this book starts with the notorious, challenging, perplexing, incorrectly defined and life-changing in-basket exercise. The author has many years of experience with in-baskets, which has included providing feedback to candidates and training assessors. Many of the essential sample exercises and components of the in-basket exercise are included in this book and have been used in past assessment center processes or in customized exercises. This second edition also includes a new chapter on "The Future of Policing Exercises," and several new exercises have been included in the Exhibits Appendix. After reading the sample exercises and commentary contained herein, you will be convinced that your time and money have been well spent. Why? Because you will have practiced the exercises herein and, beyond just reading about the assessment center process, you will have learned about many of the most important components of the process.

Practice Scenarios was developed to help prepare dedicated firefighters of all ranks to handle problems and challenges in four major areas: Fire Incidents (structure Fires, outdoor fires, vehicle fires), Non-Fire Incidents (hazardous materials, collapse, vehicle accidents, compounded incidents), Supervision and management (dealing with subordinate problems such as insubordination), and Administrative tasks (creating community relations programs, SOP's, department policies, etc). The book is especially helpful for individuals who are preparing for career advancement examinations and interviews. For each of the four areas you will be introduced to helpful formats and fireproof tips that will give you an edge and help elevate your situational and scenario awareness.

From the author: This 3rd edition is about organized common sense in the fire service. Section One provides support to fire departments that already have a strategic plan and just need to update and revise their existing plan. I have found over my 30 years of consulting with fire department's that they want to accomplish their next iteration of their strategic plan as rapidly as possible. Section Two provides a detailed "How-to" guide to help a fire department create its first strategic plan. Section Two is divided into four parts: (1) Understanding the Department, (2) Understanding the Situation, (3) Understanding the Strategic Issues Facing the Department, and (4) Creating Organizational Change. A new chapter (Chapter 20) provides assistance to those departments having challenges with their strategic plan and obtaining the desired outcomes/results. It adds a new troubleshooting process for those departments having challenges to create an effective and successful strategic plan. The book is designed to be effective as a manual to develop an individual fire department's strategic plan as well as a textbook for use in upper
