Measuring Praise And Criticism Inference

Positive semantic orientation indicates praise (e.g., " honest ", " intrepid ") and negative semantic orientation indicates criticism (e.g., " disturbing ", " superfluous "). Semantic orientation varies in both direction (positive or negative) and degree (mild to strong).

Measuring Praise and Criticism: Inference of Semantic ...

Positive semantic orientation indicates praise (e.g., "honest", "intrepid") and negative semantic orientation indicates criticism (e.g., "disturbing", "superfluous"). Semantic orientation varies in both direction (positive or negative) and degree (mild to strong). An automated system for measuring semantic orientation would have application in text classification, text filtering, tracking opinions in online discussions, analysis of survey responses, and automated chat systems (chatbots).

Measuring praise and criticism: Inference of semantic ...

Measuring praise and criticism: Inference of semantic orientation from association. The evaluative character of a word is called its semantic orientation. Positive semantic orientation indicates praise (e.g., " honest ", " intrepid ") and negative semantic orientation indicates criticism (e.g., " disturbing ", " superfluous "). Semantic orientation varies in both direction (positive or negative) and degree (mild to strong).
