The four programs together make the Office 2016 suite, which was released to the public between July and September of 2015. The new Microsoft Word 2016 has been outfitted with a collaboration feature; created to enable up to ten users to work in and make adjustments to the same document, all at the same time. This collaboration is made possible with the use of the cobalt syncing technology. Users may view the names of the authors as well as the changes being made by each.
