Screw #1, on the throttle lever, adjusts the starting point of the pump stroke. To start the pump sooner (smaller throttle opening), back the screw out. To start it later, turn the screw in. Screw #2 adjusts the pump's end point. Best performance is generally achieved when the pump stroke ends before 3/4 throttle.

Tuning Manual 050102 - Mikuni Corporation

Mikuni offer slides for their round slide carbs in 4 to 5 different sizes. Flat slide carbs generally do not offer as many sizes. If you find the mid-range is good between 25-50 percent throttle but is problematic between 50-75 percent throttle, a new jet or needle may be required. Mikuni offers several needle jet sizes and as mentioned before, a wide variety of needles as well.
