commonly encountered in conducting business in the oil and gas industry. Written for a global audience, William Hughes devotes substantial attention to industry legal problems arising under non-U.S. legal systems like those in the European Union and Islamic law regimes. Including case studies, and end of chapter questions and notes, Fundamentals of International Oil & Gas Law is an excellent desk reference, course textbook, or introductory guide to this important subject matter.

This highly successful book brings together academic and practising lawyers to consider the key regulatory and contractual dimensions of the mature hydrocarbon province. Now in its second edition, the text has been fully updated. New chapters look at Energy Security, Law and Technology in the Oil Field and Acquisitions and Disposals.

The authors have retained the basic structure of prior editions, but have further integrated implied covenants issues with express lease issues and conservation with pooling and unitization, as well as adding new cases and editing the old materials. The book includes environmental law materials in a separate chapter, reflecting the editors' view of their importance and adapting the book for use in an advanced course, as well as a basic course

The UK Oil and Gas industry has evolved at unprecedented speed over the past four decades. It has attracted a great deal of attention from a range of industry players and regulators throughout the world. This is largely because the petroleum industry brings together the most powerful public and private actors in the form of states and trans-national corporations. Oil and Gas Law provides a comprehensive overview of the central legal issues in the UK oil and gas industry today. It is essential reading for the wide range of players in the oil and gas industry, including policy makers, researchers and academics. Oil and Gas Law covers such important topics as: Ownership of oil and gas law; Operating in the UKCS; Oil and gas contracting in the UK; Oil and gas taxation; Dispute resolution in oil and gas contracting; Environmental regulation in UKCS; Health and Safety issues; Renewable energy issues; Decommissioning. Written in a clear and reader-friendly style this is an invaluable source of reference for all those requiring up-to-date guidance on legal issues affecting the UK oil and gas industry.

Central Asia has emerged as potentially the most important new hydrocarbon province in decades. Among the countries whose natural resources are now the focus of world attention, Kazakhstan is very much in the front rank. The scale and strategic importance of its reserves mean that it is set to become one of the key players in the global market. Realising that potential depends on many factors, not least its legal treatment of the oil and gas industry. The contributors to this volume consider the various dimensions of that legal treatment, including investment and contractual issues, dispute settlement, transport and refining, environmental issues, and taxation. The importance of the international context for Kazakhstan's domestic law is a key feature of this book, as is a concern with identifying existing problems and suggesting the most fruitful direction for reform. The book will be of interest to practitioners and academics working in the specific field as well as in the more general area of legal relations between the oil and gas industry and transition economies. Ilias Bantekas is Reader in Law at the University of Westminster, London, UK. He has written widely in the field of international law and won the International Committee of the Red Cross Paul Reuter prize in 2000. Visiting Fellow at Harvard Law School (2003-04). John Paterson is Reader in Law at the University of Westminster, London, UK. He has written on the regulation of the oil and gas industry and acts as a consultant to the OECD Nuclear Energy Agency. Maidan Suleimenov is Professor of Law at the Kazakh State Academy of Law and Adilet Higher Law School, Almaty, Kazakhstan. He was directly involved in Kazakhstan's accession to the Energy Charter Treaty and has also been responsible for legislative drafting in the field.
